

# Local California Smokefree Housing Policies: Detailed Analysis

**April 2017**

Smokefree housing is the next frontier in California's ongoing effort to protect its citizens from secondhand smoke. Although California has made great progress in getting secondhand smoke out of workplaces, for the many Californians who live in multi-unit housing, breathing secondhand smoke which drifts from neighboring units, balconies and outdoor areas has become a real health problem.

This document provides a detailed and in-depth description of all 90 California cities and counties with smokefree housing policies including those that cover only common areas and those that only have disclosure. This document contains details of the enforcement mechanisms and implementation steps, type of units covered and whether there is a nuisance provision in these policies. The policies are listed in the table in reverse chronological order from the most recently passed.

To review the 51 jurisdictions that are passing strong, comprehensive smokefree multi-unit housing policies within a certain percentage of units, please refer to the [Matrix of Strong Local Smokefree Multi-Unit Housing Ordinances document](#).

The 90 cities and counties listed on this Matrix have led the way on this emerging issue and are building momentum for other legislative action around the state. Please contact the Center at [center4tobaccopolicy@gmail.com](mailto:center4tobaccopolicy@gmail.com) for more information about any of these policies or for campaign assistance in passing a smokefree housing policy. For a snapshot of these policies, see our other documents available on the Center's website, [www.Center4TobaccoPolicy.org/smokefree-multi-unit-housing/](http://www.Center4TobaccoPolicy.org/smokefree-multi-unit-housing/). For sample ordinance language on smokefree housing, please visit the ChangeLab Solutions' website at <http://www.changelabsolutions.org>
